CISC 498
Open-Source Project Acceptance Form

The undersigned agree to the conditions of this project:

- All software developed in this course is owned by its inventors: the developers (students), the customer and the supervisor. The software will be released under an Apache 2 open source license.
- The customer agrees to be accessible to students as is reasonably required to complete the project and to participate in evaluation of the students’ work.
- The supervisor agrees to provide guidance to the students as reasonably required to complete the project.
- The students agree to consult with the customer on an ongoing basis during this course and to be respectful of the customer’s time in so doing.

Project title: Tensegrity Robotics Toolkit Extension
