CISC-235

STACK CHALLENGE

If you recall, at the bottom of the instructions of the C++ homework for week 2 I added:

>   If you are up for a challenge, then the student(s) who has implemented a stack in the largest variety of ways will be singled out for special distinction!

I am pleased to report that Roman Suvorov is the winner of this distinction. Congratulations Roman!

Figure 1: Roman Suvorov the winner of the CISC-235 "Stack Challenge". Roman implemented several versions of a stack in C++ and demonstrated it for us using a very cool user interface that he wrote in Visual Basic.
